

# CONCRETE

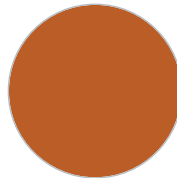

## HIGH QUALITY PIGMENTS FOR CONCRETE

Procter Johnson pigments can be used to colour a variety of cement based products such as concrete block paving, roof tiles, grouts, wet cast paving, bricks, terrazzo, industrial flooring, ready mix concrete, GRC, precast, etc..

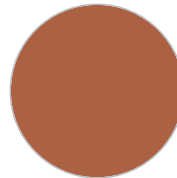

The standard colour range represents some of the more popular grades used by manufacturers of concrete products. We also provide a colour matching service and bespoke shades on request. Most shades are available in powder and liquid form.

Procter Johnson powder pigments are available in multi ply paper sacks and bulk bags. We also offer specialist packaging such as water soluble bags, with customised weights to suit individual requirements. Please contact us for details.

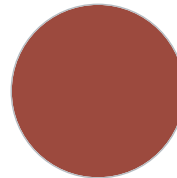

Procter Johnson is the leading independent supplier of pigments to the construction industry in the UK. We also service customers in over 40 countries, spanning 5 continents. This is serviced from our facilities in the UK & China.
